# Introduction

This documentation contains some help to [examples from akka-examples repository](#). Akk playground projects

# Chapter 1. Implementation

## 1.1. Java Gradle Maven Docker Starter [\[Build Status\]](#)

This is just an Akka java gradle / maven / docker / starter project...

*build and test*

```
docker-compose down -v; ./mvnw clean package; ./gradlew clean build; docker-compose up
--build --force-recreate --remove-orphans

# or
docker-compose down -v
./mvnw clean package
./gradlew clean build
docker-compose up --build --force-recreate --remove-orphans
```

## 1.2. Kotlin Gradle Maven Docker Starter [\[Build Status\]](#)

This is just an Akka kotlin gradle / maven / docker / starter project...

*build and test*

```
docker-compose down -v; ./mvnw clean package; ./gradlew clean build; docker-compose up
--build --force-recreate --remove-orphans

# or
docker-compose down -v
./mvnw clean package
./gradlew clean build
docker-compose up --build --force-recreate --remove-orphans
```

- [Akka docs](#)

## 1.3. akka

generated using [jvm](#) yeoman generator

*build*

```
./mvnw clean package com.dkanejs.maven.plugins:docker-compose-maven-plugin:1.0.1:up
./mvnw com.dkanejs.maven.plugins:docker-compose-maven-plugin:1.0.1:down

./gradlew clean build composeUp
./gradlew composeDown
```

## 1.4. another-akka-try

*test*

```
./gradlew clean installDist
bash build/install/another-akka-try/bin/another-akka-try

./gradlew clean distZip
unzip -o build/distributions/*.zip -d /tmp
bash /tmp/another-akka-try-0.0.1/bin/another-akka-try

./mvnw
java -jar target/*-all.jar
```

*build*

```
./mvnw clean package com.dkanejs.maven.plugins:docker-compose-maven-plugin:1.0.1:up
./mvnw com.dkanejs.maven.plugins:docker-compose-maven-plugin:1.0.1:down

./gradlew clean build composeUp
./gradlew composeDown
```

generated using [jvm](#) yeoman generator
